

# SUBJECT INDEX

- <sup>228</sup>Ac, in sediments 357  
 accelerator mass spectrometry 136  
 acetic acid, thermal origin 605  
 acid  
     acetic 605  
     oxalic 605  
     propionic 605  
 acid tailings fluid 231  
 actinides, in Archean granite 37  
 activation analysis 329  
 activity  
     alpha 55, 67  
 Adige River estuary, northern Italy 357  
 adsorption 231  
     Cu 213  
     Cu on  $\delta$ -MnO<sub>2</sub> 217  
         salinity gradient effects 213  
 adularia 103  
     alteration mineral in layered complex 73  
 Africa, Damara Orogen, Namibia 535  
 Ag, in geothermal waters 579  
 age dating, Canadian Shield groundwaters 136  
 age determination 135, 621  
 Al 103, 193  
     in coal leachates 427  
     in oilfield waters 613  
     mobility 231  
     in stream sediments 437  
 Alberta, Canada, Calgary 205  
 albite 103  
 albitite 285  
 aliphatic acid anions  
     in formation waters 543  
 aliphatic acids 605  
 $\alpha$ 22R-homohopane 305  
 alteration 649  
     fracture-controlled 73  
     history 37  
     isotopic 135  
     low temperature 137  
     mineralogy 181  
     minerals 135  
     multiple 73  
     post-magmatic 163  
     rock, low temperature 3  
 amorphous ferric hydroxide 231  
 amphibole, calcic  
     alteration mineral in layered complex 73  
 analysis of fluid inclusions 321  
 analytical methods  
     thin-layer chromatography 227  
     xrf 337  
 analytical model 535  
     sedimentary basins 649  
 andesite  
     anhydrite-bearing 337  
     high-k 337  
 anhydrite 373, 495  
     magmatic 337  
     Sr isotopes 523  
 anorthosite 73, 93, 103  
 anorthosite-gabbro 103  
 apatite 205  
 Applied Geochemistry 1  
 aqueous 193  
 aquifer, Chalk, UK 251  
 Ar, in formation fluids 621  
<sup>40</sup>Ar 621  
 Ar-Ar dating  
     adularia 73  
     hornblende 73  
 Archean 37  
 As, in stream sediments 437  
 asphalt 305  
 Atikokan, Ontario, Canada 55, 67  
 atmosphere, input to Chalk aquifer 251  
 Au 535  
     analysis 227  
 Australia  
     Mt. Brockman, Northern Territory 385  
     Northern Territory 133  
     Northern Territory, Mt. Brockman 385  
 authigenic  
     quartz 507  
 Ba 103  
     in groundwater 417  
 Baiyun Ebo, Inner Mongolia Autonomous Region, People's Republic of China 181  
 barite 417  
     in salt dome cap rocks 523  
 basalt, trace S 127  
 base metal deposits, origin 649  
 basinal brines, East Tennessee 321  
 $\beta$ -hopane 305  
 Be  
     in coal leachates 427  
     hydrothermal transportation 193  
 Be(OH)<sub>3</sub><sup>-</sup> 193  
 benzothiophenes, in sediments 297  
 Berkshire, United Kingdom 251  
 beryl, solubility with kaolinite and quartz 193  
<sup>214</sup>Bi, in sediments 357  
 biomarkers, crude oil 305  
 biosphere 139  
 biotite  
     alteration mineral in layered complex 73  
 bitumen 305  
 bone phosphate, O isotopes 367

## ISOTOPES

- 21,22Ne in groundwater, Canadian Shield 136
- O 103, 134, 251, 459, 495
  - in calcite 81
  - in formation waters 134
  - in teeth and urinary stones 367
- 18O
  - Canadian Shield brines 133
  - in groundwater 25
- Pa 134
- Pb 136
- Ra 134, 385
- radioactive 5
- radiogenic and stable 137
- S 127, 523
  - in formation waters 134
  - in human kidney stones 205
  - in pyrite 81
- 34S, Canadian Shield brines 133
- Sr 81, 93, 459, 495, 477, 523
- stable 5
  - H 563
  - O 563
  - S 563
- Th 134
- U 134
  - in groundwater 417
- 230Th in crystalline rocks 135
- 234U
  - in crystalline rocks 135
  - in Archean granite 37
- 238U
  - in crystalline rocks 135
  - in Archean granite 37
- water-rock interaction 136
- isotopic
  - equilibrium 135
  - variation 81, 563
- Israel, Negev Desert, Zin area 347
- Italy
  - north, Adige River estuary 357
  - northern Adriatic Sea 357
- jarosite 399, 427
- jordisite 399
- K 103, 285
  - availability 243
  - during hydrothermal alteration 181
  - in Archean granite 37
  - in coal leachates 427
  - in fluid inclusions 321
  - in lavas and pumice 337
  - in synthetic  $\delta$ -MnO<sub>2</sub> 217
- 40K, in sediments 357
- K-Ar dating 73
- K/Na ratio, in fluid inclusions 321
- kaolinite, solubility with beryl and quartz 193
- kidney stones 205
- O isotopes 367

kinetics, sorption and dissociation 275  
 Klipperas, Sweden, Taavinumnanen 136  
 Kr, in formation fluids 621

## MEDICAL GEOCHEMISTRY

teeth and urinary stones 367  
 melanterite 427  
 metal sulfides, in salt dome cap rocks 523  
 metallogenesis 563  
 metamorphism 285, 563  
   retrograde 73  
 metasomatism, hydrothermal 181  
 metasomes, U deposits 285  
 Mexico
 

- Chiapas 337
- El Chichon Volcano 337

Mg 103, 285
 

- in coal leachates 427
- in dolomitization models 629
- in formation waters 373
- in hematite carbonatites 163
- during hydrothermal alteration 181
- in lavas and pumice 337

Mg/Ca ratio, in groundwater 251  
 Michigan, USA 495  
 migration, Np in clayey sand 275  
 mineralogical effects, xrf analysis 337  
 minerals, ferromagnesian 67  
 minor elements, in groundwater 251  
 MINTEQ 231  
 Mississippi Valley ore deposits
 

- source of metals 543

mixing
 

- brine 134
- groundwater 134

Mn 103
 

- in coal leachates 427
- Fe-Mn oxide 213
- in formation waters 543
- in geothermal brines 563
- in stream sediments 437
- mobility 231
- preparation of  $\delta$ -MnO<sub>2</sub> 217

- Mo 285
  - in porphyry deposits 399
- mobility
  - elemental 136
  - U 285
- model, thermo-diffusive mass transport 639
- modelling 193, 231, 629
  - isotopic 81
  - sedimentary basins 649
  - transport of Np 275
  - U-etching 55, 67
  - U-leaching 55, 67
  - water-rock interaction 523
- models, dolomitization 629
- molybdenite, in porphyry deposits 399
- Mt. Brockman, Northern Territory, Australia 385
- muons 133
- Muzo, Colombia 193
  
- N 143
- n-alkanes 305
- Na 93, 103, 285
  - in Archean granite 37
  - in coal leachates 427
  - in fluid inclusions 321
  - during hydrothermal alteration 181
- Na-F, hydrothermal solutions 181
- Na/Ca ratio, in fluid inclusions 321
- NaCl 649
- Namibia, Damara Orogen, Africa 535
- natural gas
  - noble gases 621
  - origin 621
- Nb 103
- Ne, in formation fluids 621
- Negev Desert, Zin area, Israel 347
- neutrons 133
- New Zealand
  - Ngawha Springs 305
  - North Island 579
  - White Island 143
- Ngawha Springs, New Zealand 305
- NH<sub>3</sub>, in fumarole gases 143
